

KAMIL PINAS

FRONTEND DEVELOPER

Frontend Developer specializing in data-heavy industrial dashboards using React, TypeScript, and Electron. Experienced in optimizing high-volume datasets (50k+ records) and replacing DOM-heavy UIs with WebGL (PixiJS) for performance. Focused on strict typing, maintainable component architecture, and visualization tools like D3.js and AG Grid

EXPERIENCE

Frontend Developer

Software Interactive (Contractor) 2021 – Present

Zebra (Aurora Focus) – Workforce & Device Management

- Co-developed a cross-platform Electron desktop application, interfacing with Node.js and C++ backends to control industrial hardware.
- Leveraged PixiJS (WebGL) to implement high-frequency data visualization for industrial scanning, bypassing DOM performance bottlenecks to ensure smooth operation under heavy load.
- Designed a lightweight, scalable state management system using React Context API and custom hooks to handle complex device configurations.
- Integrated real-time AI/OCR data streams, creating a seamless feedback loop between industrial smart cameras and the user interface.

TSR – Industrial Vision & AI Platform

- Built the core B2B workforce management dashboard using React and TypeScript, serving as the primary UI for device tracking.
- Developed custom D3.js heatmaps to visualize computer vision metrics, replacing static tables with interactive data points for faster image analysis.
- Implemented client-side PDF generation functionality, enabling instant export of detailed analytical reports and charts for stakeholders.
- Optimized AG Grid implementation to handle 50,000+ rows with virtualization, reducing initial render time by ~40% and eliminating scroll lag.

EDUCATION

Bachelor's Degree in Computer Science

Academy of Science in Tarnow

2022

Cracow, Poland

+48 730697499

kamilpinas@gmail.com

github.com/kamilpinas

linkedin.com/kamil-pinas

SKILLS

CORE STACK

React, TypeScript, JavaScript (ES6+)

UI & STYLING

TailwindCSS, Material UI (MUI), SCSS

ARCHITECTURE & STATE

Electron, Redux Toolkit, Context API, WebSocket, REST API

VISUALIZATION & DATA

PixiJS (WebGL), AG Grid, D3.js, PDF Generation, Lodash

TOOLS & PERFORMANCE

Docker, Webpack, Git

AI & AUTOMATION

GitHub Copilot, Gemini CLI

PORTFOLIO
